

WEEK 1.a:

Hello everyone,

My name is Harshita Gogia. I am currently in my pre-final year, pursuing a BTech in Computer Science and Engineering at Graphic Era Hill University, Dehradun. I completed my schooling at St. Jude's School, Dehradun, where I developed a strong foundation in PCM and Computers.

I have always been passionate about technology, problem-solving, and innovation, and my ultimate aim is to build a career in software development and cloud computing.

I have also been actively involved in several projects, including:

- **AWS Cloud Computing Projects:** Worked on hands-on labs and real-world cloud deployment scenarios as part of my AWS certifications.
- **Blood Bank Management System:** The Blood Bank Management System (BBMS) is a browser-based platform that streamlines blood donation services, inventory management, and donor records while ensuring transparency, efficiency, and corruption-free operations.
- **Weather Dashboard using React:** This project involves developing a real-time weather application using React.js, Node.js, and a weather API to provide users with up-to-date weather information through a user-friendly interface.

To enhance my technical skills, I have earned the **AWS Cloud Quest: Cloud Practitioner certification** and completed the **AWS Cloud Practitioner Essentials course**. These certifications have deepened my understanding of cloud computing, infrastructure, and deployment strategies.

Beyond academics, I am a passionate dancer and an active member of the Dehradun Bhangra Club. I have participated in India's Got Talent auditions and various dance competitions. Additionally, I enjoy playing badminton, athletics, and traveling to spiritual places.

I believe in continuous learning, perseverance, and hard work. I am excited about the opportunities ahead and look forward to contributing my skills and enthusiasm to the field of software development, AI, and cloud computing.

Thank you for your time!
